SCION Day, 18.10.2023

SCION - A GROWING ECOSYSTEM

SCION – A CUTTING EDGE TECHNOLOGY

TOP NOTCH TECHNOLOGY

SCION ensures reliable and performant data transmission across the Internet. It is extensively tested and it is deployed for critical workloads.

MULTIPLE IMPLEMENTATIONS

Commercial and open-source.

STRONG RESEARCH AND DEVELOPER COMMUNITY

A vibrant research community keeps pushing the boundaries of the technology.

LEADERSHIP ANNOUNCEMENT

Nicola Rustignoli
co-CEO-elect
SCION Association
Switzerland

Luzius Cameron
co-CEO elect
SCION Association
Switzerland

OUR JOURNEY TO A SAFE CONNECTED WORLD

GROWING THE SCION MOVEMENT

Value

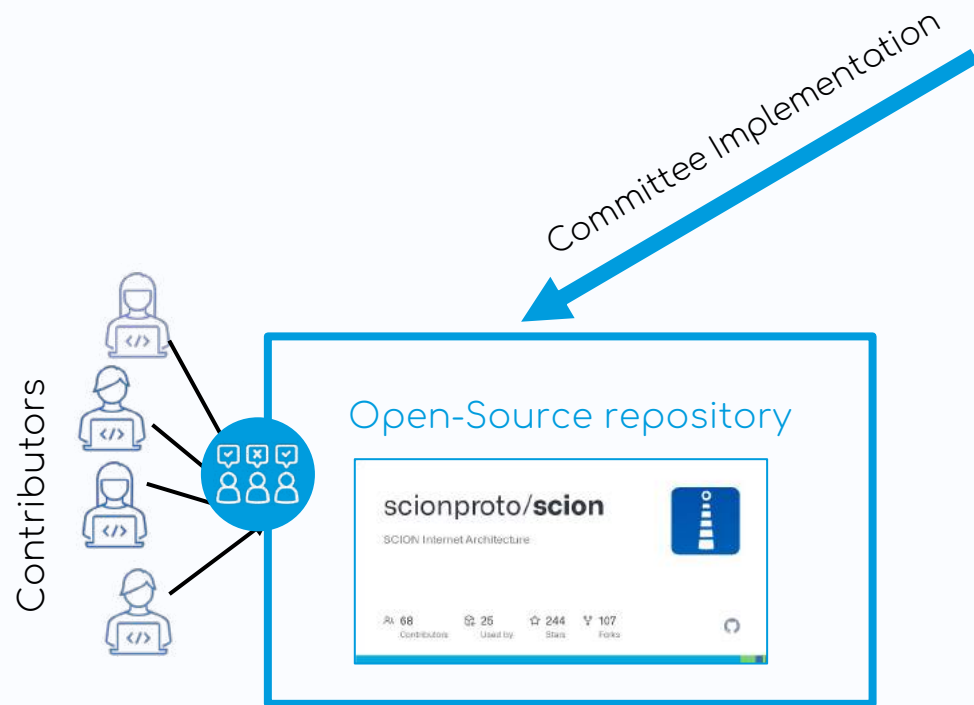

TECHNOLOGY

The technology keeps evolving to provide more and more benefits to its users, more use cases are developed and deployed.

ECOSYSTEM

The ecosystem keeps growing together, creating new adoption areas and building up a larger and larger SCION network.

OPEN GOVERNANCE FOR THE TECHNOLOGY

STANDARDIZATION

INTEROPERABILITY

Multiple implementations can speak the same “language”

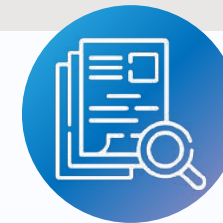

OPEN ECOSYSTEM

Anyone can succeed thanks to a clear specification

BETTER TECHNOLOGY

Wider community review by renowned experts and global recognition

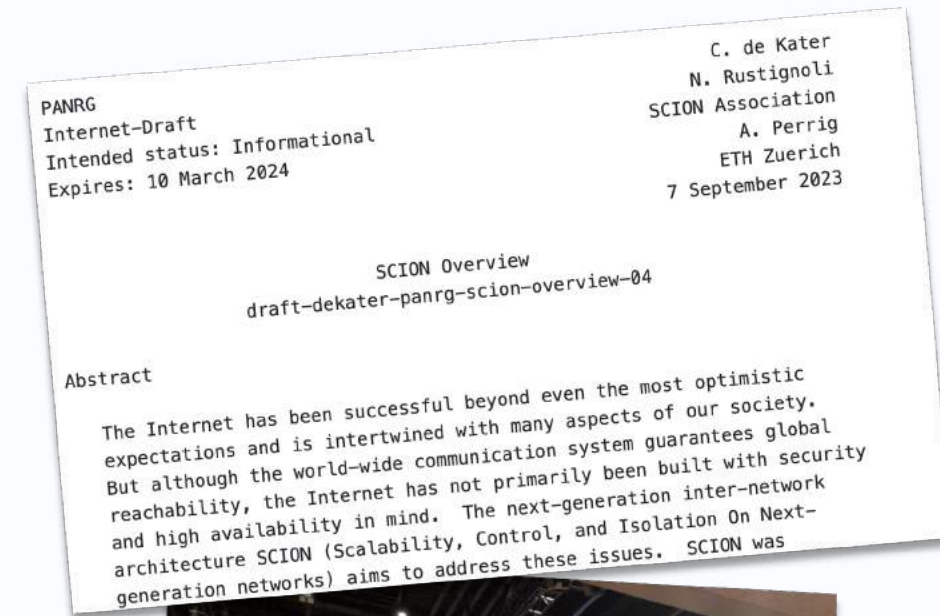

CERTIFICATION

A clear specification is fundamental for a certification program

IETF JOURNEY

- Our member-based standardization technical committee is producing the first SCION draft specification.
- The Association staff represents the SCION community at standardization development organizations such as the IETF.
- A specification of all core SCION components is available at: datatracker.ietf.org
- We'll meet at IETF 118 in Prague in November to continue working on drafts and for the IETF hackathon.

FOSTERING A HEALTHY OPEN-SOURCE COMMUNITY

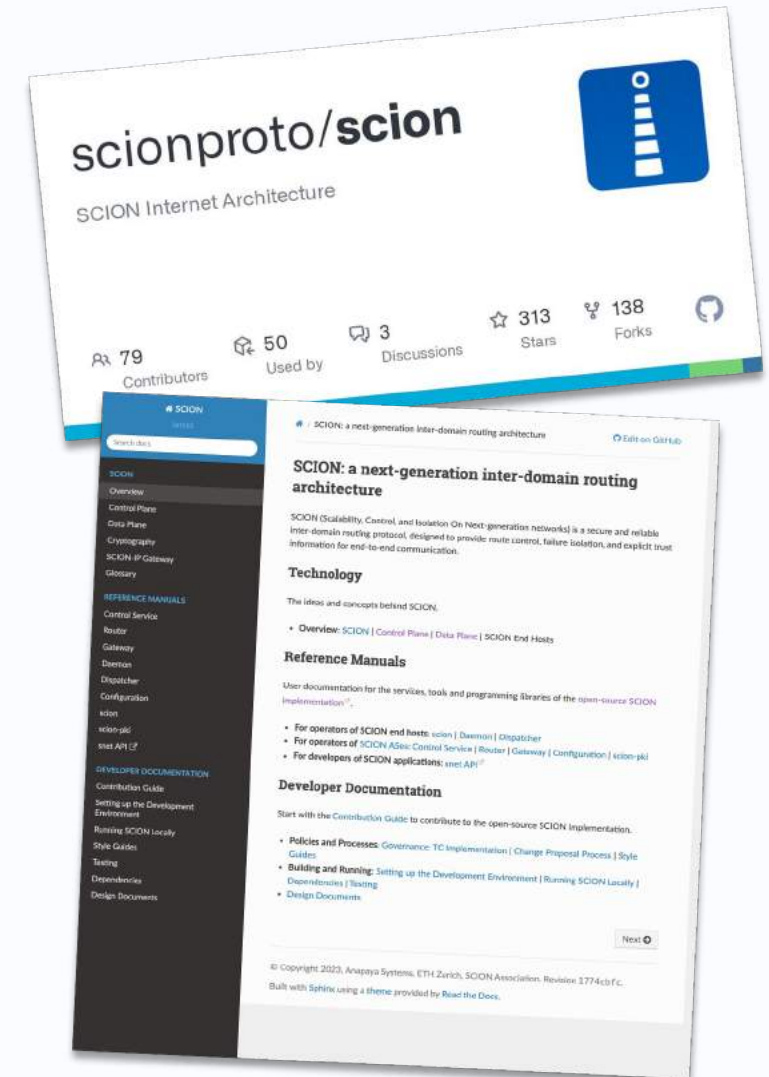

We are custodians of the open-source SCION implementation, and actively contribute to software development projects. We support by reviewing code contributions, providing documentation, defining the open-source roadmap, and organizing member community meetings.

Why do we do this?

- To make sure the SCION ecosystem can rely on a stable, quality reference implementation.
- To have a vendor-independent, low-barrier entry point to SCION.
- To ensure that there are multiple software options for SCION adopters.

Why join?

- Get to know about latest developments & get a say about what comes next!
- See scion.org/development for more info.
